- Sturdy structure
- Brass wear-resistant bar
- Blades in steel HB450
- Flow valve
- 360° swivel joint

The hedge trimmer M3 allows you to cut branches, hedges and bushes up to Ø 15 cm. Its sturdy structure allows continuous and heavy uses. The special milling, along with the specific inclination of the coupling tube, makes the branch entrance easier, ensuring a clean and precise cut. The ergonomic casing eases the uses in areas with thick vegetation. Suitable for excavators up to 20 T and backhoe loaders.

Equipped with: flow valve, antishock valve, 360° swivel joint, blades in steel HB450, brass wear-resistant bar.

OPTIONAL

	Hydraulic fifth wheel	Hydraulic hoses
Bolted bracket*		

*The hedge trimmer is supplied with a flat drilled plate
